

## List of Figures

1. Map of sampling locations (Stations 1, 5, and 6) in the lower Neuse River Estuary.....	5
2. Surface measurements of the temperature at Stations 1, 5, and 6. Line represents mean of stations measured.....	11
3. (Top panel) Neuse River mean monthly flows at U.S.G.S. gauging station in Kinston, N.C. Dashed line=60 year average flow (J. D. Bales, U.S. Dept. of Interior, Geological Survey, Water Resources Division, Raleigh, NC). (Middle panel) Surface measurements of the salinity at stations 1, 5, and 6. Line=mean of stations measured. (Bottom panel) Monthly rainfall totals at the Institute of Marine Sciences, Morehead City, NC. Dashed line=average monthly precipitation for southern section of the A.P.E.S. area (118.5 mm/month). (H. Porter, U.N.C. Institute of Marine Sciences, Morehead City, NC).....	12
4. Representative vertical profiles of temperature measured at Station 6.	15
5. Representative vertical profiles of the dissolved oxygen concentrations at Station 6. ....	16
6. Representative photosynthetically active radiation (PAR) profiles from Station 6.....	17
7. Nitrate ( $\text{NO}_3^-$ ) (top panel), ammonium ( $\text{NH}_4^+$ ) (middle panel), and phosphate ( $\text{PO}_4^{3-}$ ) (bottom panel) concentrations of surface waters at Stations 1, 5, and 6. Line represents mean among stations.....	18
8. (Top and middle panel) Chlorophyll <i>a</i> concentration of selected nutrient addition treatments minus controls, averaged over the four days of each bioassay. N(14.3) or N(28.6) = addition of 14.3 or 28.6 $\mu\text{gN/l}$ (respectively) as $\text{NO}_3^-$ . P(3.2) = addition of 3.2 $\mu\text{gP/l}$ as $\text{PO}_4^{3-}$ . Error bars not visible are smaller than symbol. (Bottom panel) Dissolved inorganic nitrogen (DIN) to dissolved inorganic phosphorus (DIP) ratio (by atom). No error bars plotted.....	23
9. (Top and middle panel) $^{14}\text{C}$ assimilation of selected nutrient addition treatments minus controls, averaged over the four days of each bioassay. Symbols as in Figure 10. (Bottom panel) Nitrate ( $\text{NO}_3^-$ ), Ammonium ( $\text{NH}_4^+$ ), and Phosphate ( $\text{PO}_4^{3-}$ ) concentrations of surface waters at Station 6. Data compiled from Figure 7; presented here for comparative purposes.....	24
10. (Top panel) Surface measurements of the chlorophyll <i>a</i> at Stations 1, 5, and 6. (Bottom panel) Areal productivity values measured at Stations 1, 5, and 6. Line represents mean among stations measured....	27
11. Mean total copepods at Stations 1, 5, and 6. Error bars represent SEM (n=3).....	30
12. Mean total cladocerans at Stations 1, 5, and 6. Error bars represent SEM (n=3).....	33
13. Mean total harpacticoid copepods at Stations 1, 5, and 6. Error bars represent SEM (n=3).....	34
